

Gurango Software Corporation receives distinction from Microsoft

(Manila, Philippines, July 29, 2008) – Philippine-based global software company Gurango Software Corporation has debuted in the Microsoft Dynamics Business Solutions Catalogue—an online resource book featuring certified Microsoft partners worldwide and showcasing partner-offered solutions—as the only Philippine partner to be included in the international catalogue.

The catalogue features 107 business solutions from Microsoft’s independent software vendor (ISV) partners, all tested and certified for Microsoft Dynamics. Among the solutions cited was Gurango Software’s Forum Management Series—a suite of proprietary solutions for events, training, membership and subscription management that seamlessly integrate with the Microsoft Dynamics platform. The software provides users with completely integrated operational, eCommerce, sales, marketing, and accounting modules.

In addition, Gurango Software was also featured in a customer solutions case study conducted by Microsoft. The case study said Gurango Software’s Philippine headquarters has effectively leveraged its Microsoft certifications to substantially expand its customer base through shorter development cycles and faster project implementation.

“Achieving Microsoft certification has always been among the main priorities of Gurango Software. As a team, we are committed to providing relevant and robust business solutions that effectively meet the expectations and needs of our customers,” said Gurango Software chief operating officer Tarcs Taruc. “Our inclusion in the catalogue and the case studies shows how our professional commitments are truly paying off.”

Gurango Software Corporation develops and distributes business solutions that can be deployed as stand-alone applications or integrated with the Microsoft Dynamics platform. Aside from the Forum Management Series, Gurango Software also offers SmartHR, a high-impact suite of human resource solutions; and DynamicPay, a payroll platform designed for the complex requirements of multinational companies. Gurango Software also operates as a Microsoft Dynamics value-added reseller (VAR) that implements, maintains and customizes Microsoft Dynamics.

Gurango is a Microsoft Gold Partner and a member of the prestigious Microsoft Dynamics President’s Club.
